Product PLP (Preferred Landing Page)

The Product PLP will be targeted to an individual product and will contain the following key pieces of information:

- Product price point
- Get Samples
- Get a Quote with drop down menus to select job specifications. The ability to capture zip code information will be at this step to facilitate accurate freight charges.

Additional information will include:

- Product details and key features
- Resource links to file preparation tips and Application Templates
- Content and Links to custom Design Services

My Quote (Shopping Cart View)

The screen will enable the user to:

- View job specifications with product thumbnail image
- Select shipping options (defaulted to the most cost effective option based on previous zip code entry and the total will refresh if modified)
- Modify Quantity (total will refresh if modified)
- Ability to remove a job
- Ability to Continue Shopping
- Ability to Send This Quote to their email (this enables the user to keep a localized copy of the quote. It will also enable Acme to market to this customer such as emailing them a message... "We noticed you have saved a quote. We would like your business and here is a promotional code for an additional 10% off.") This would be a phase 2 feature.
- Ability to enter promotional codes
